Issues planned by the Federal government in the fourth quarter of 2023

The Federal government's issuance plan for the fourth quarter of 2023 will be reduced by a total of \leqslant 31.0 billion compared to the annual forecast published in December 2022. The announced borrowing on the capital market will be reduced by \leqslant 8.0 billion in the fourth quarter and \leqslant 23.0 billion less will be raised on the money market. The reduced issuance volume results from lower financing needs of the Federal budget and its special funds, especially in connection with the measures taken by the Federal government to address the energy crisis. For the whole year, the issuance volume announced in the annual forecast will thus be reduced by a total of \leqslant 45.0 billion in 2023.

The following adjustments are made:

- For the new issue of the Federal treasury note maturing in December 2025 on 17 October 2023, the issuance volume will be reduced by €1.0 billion to €5.0 billion. In addition, the subsequently planned reopenings of this bond will be reduced in volume. This applies to the reopening date on 14 November 2023 (reduction by €0.5 billion to €5.0 billion) and to the tap on 5 December 2023 (reduction by €0.5 billion to €4.5 billion).
- The volume for the reopening of the 5-year Federal note maturing in October 2028, planned on 21 November 2023, will be reduced by €0.5 billion to €3.5 billion.
- The reopening of the 7-year Federal bond maturing in November 2030 announced in the annual forecast for 6 December 2023 with a volume of €3.0 billion is cancelled.
- For the 10-year Federal bond maturing in August 2033, the reopening volume will be reduced by a total of €1.5 billion. This affects the issue on 18 October 2023 (reduction by €1.0 billion to €4.0 billion) and the issue on 29 November 2023 (reduction by €0.5 billion to €3.5 billion).
- The volume of the multi-ISIN auctions in the 15-year maturity segment announced for 25 October 2023 and 22 November 2023 will be reduced by €0.5 billion each to €2.0 billion and €1.5 billion respectively.

Number 6 on 26 September 2023 Page 2 of 5

- The following adjustments are made to the issuance schedule of Treasury discount paper:
 - o Twelve-month term: The new issue planned for October 2023 will be decreased by €2.0 billion to €3.0 billion. The volume of the new issue planned for November 2023 will be reduced by €1.0 billion to €3.0 billion. The new issue announced with the annual forecast for December 2023 is cancelled.
 - o Eleven-month remaining term: The volume of the reopenings planned for October, November and December 2023 will be reduced by €1.0 billion each to €2.0 billion.
 - o Nine-month remaining term: The reopening volume for the two issues planned for October and the one issue planned for November 2023 will be reduced by €1.0 billion each to €2.0 billion.
 - Six-month remaining term: The reopenings planned in October and November 2023 will be decreased by €3.0 billion each to €2.0 billion. The reopening scheduled for December 2023 will be reduced by €1.0 billion to €2.0 billion.
 - o Five-month remaining term: The issuance volume for the increases planned in October, November and December 2023 will be reduced by €1.0 billion each to €2.0 billion.
 - o Three-month remaining term: The volume of the reopening planned for November 2023 will be reduced by €1.0 billion to €2.0 billion.

For the announced multi-ISIN auctions in the 15- and 30-year maturity segment, the benchmark bonds to be tapped in the fourth quarter are now fixed. They can be found in Annex 1. The second Federal security for the respective multi-ISIN auction will be announced in the week before the corresponding issue.

The issuance of inflation-linked Federal securities in November 2023 as announced in the annual forecast is cancelled.

The annual issuance preview for 2024 will be published in December 2023.
