Issues planned by the Federal government in the second quarter of 2024

The Federal government's issuance plan for the second quarter of 2024 remains unchanged compared to the annual forecast published in December 2023. For the multi-ISIN auctions in the 15- and 30-year maturity segment announced in the second quarter, the benchmark bonds intended to be reopened are specified in Annex 1. The second Federal security for the respective multi-ISIN auction will be announced in the week before the corresponding issue. Similarly, for issues in the green segment, the respective Green Federal securities and their issuance volume will be announced in the week prior to the dates listed in Annex 1.

The update/confirmation of the issuance schedule for the third quarter will be published in June 2024.

As a general rule applicable to all Federal securities, amounts and issue dates stated in the annual preview may change, depending on the financing requirements and liquidity situation of the Federal government and its special funds, and/or subject to conditions on the capital markets. However, the Federal government plans to execute the planned issuance to the largest extent possible in order to provide market participants with a reliable orientation for their investment decisions.
