### **New issue of a 10-year Green Federal bond 2023 (2033) Increase of the conventional Federal bond 2023 (2033)**

Today, the Federal Government has issued a new 10-year Green Federal bond 2023 (2033) via syndicate. The Green Federal bond has a coupon of 2.30%. Its value date is 3 May 2023 and it will mature on 15 February 2033. The issuance volume was € 5.25 billion (including a retained volume of € 0.25 billion). The allotment was made at a reoffer price of 98.708%.

The placement of the 10-year Green Federal bond with national and international investors was carried out by a syndicate of banks led by Barclays, BofA Securities, Commerzbank, Crédit Agricole CIB, Danske Bank and NatWest. The amount retained by the Federal Government will be used to support the liquidity in the secondary market through appropriate activities of the German Finance Agency.

The Federal Republic of Germany spent an amount equal to the proceeds derived from the issue of the Green Federal bond for expenditures that comply, on the date of the issue of the Green Federal Bond, with the requirements stipulated by the Federal Republic of Germany in its Green Bond Framework dated 24 August 2020.

Deviating from Article 1 sentence 1 (*Placing*) of the issuance terms and conditions of 21 December 2012 (the "Issuance Terms and Conditions"), the Green Federal bond will not be issued by the "Auction Process", but through the syndicate in the "Syndication Process". The conditions of the Green Federal bond and such deviation from the Issuance Terms and Conditions (the "Deviation") were determined in the Syndication Process and are published by Deutsche Bundesbank by this press release. The fixed conditions and the Deviation are part of the Issuance Terms and Conditions of the Green Federal bond.

Furthermore, with effect from 3 May 2023, the outstanding volume of the conventional twin bond, the 2.30% Federal bond 2023 (2033), ISIN DE000BU2Z007, is increased by € 5.25 billion. This increase will be added to the Federal Government's own holdings.
